

Artrin

- PAIN FROM VARIOUS SOURCES, HEALING OF WOUNDS
- MUSCULOSKELETAL PROBLEMS
- INFLAMMATORY DISEASES
- STRENGTHENING KIDNEY FUNCTION AND LIFE FORCE ENERGY
- SUPPORT OF THE LYMPHATIC SYSTEM

Artrin is a bioinformation regenerative cream with a balanced combination of herbs and high content of Podhájjska mineral spring water. The cream contains highly effective substances such as liposomes, AHAs, vitamins and peat extracts.

Artrin may have significant analgesic and antiinflammatory effects and help alleviate pain, inflammation, musculoskeletal disorders and urogenital tract disorders.

Bioinformation comprises frequencies which simulate the control impulses of subcortical brain structures, which regulate the autonomic nervous system and the function of viscera. Bioinformation acts to offset negative information and induce a reverse regenerative process.

Energy effects of Artrin according to TCM principles

Artrin may influence and harmonize mainly the following meridians: urinary, kidney, spleen, three burners (triple energizer), stomach, governing vessel, conception vessel, large and small intestine and liver.

Effects of Artrin

Pain, healing of wounds

Artrin's key benefit is that it may relieve pain from damaged joints, the spine and strained muscles, sprains and fractures, headache and inflammation of any kind. Because Artrin contains comfrey, sweet clover and ginger, it may have an excellent effect on natural tissue regeneration (including nerve tissue). Ginger may effectively support blood circulation to the tissues and help flush out inflammatory substances that cause pain. Many of the other herbs in the cream may have antiinflammatory effects. Artrin should be applied to painful areas until the pain subsides. For acute headaches, massaging the temples, forehead and hairline with Artrin can be helpful. Treating wounds with Artrin may reduce purulence and support the healing process.

Musculoskeletal system

Artrin may be exceptionally suitable for all musculoskeletal and spinal problems. It may be effective against arthrosis and arthritis and alleviate growing pains. For chronic musculoskeletal problems, combining Artrin with Renol, King Kong or Skeletin may be beneficial. Artrin can be indispensable for regeneration of cartilaginous and bone tissue after injuries or fractures.

Inflammation

Artrin contains potassium humate concentrate and several suitably combined herbal extracts, which are the main sources of its antiinflammatory effects. Artrin may be used to treat inflammation of the gall bladder, pancreas, muscles, tendons, veins, lungs, kidneys, middle ear, teeth, thyroid gland, intestines (accompanied by diarrhea) and sinuses as well as post-injury or post-operative inflammation. For joint inflammation, very frequent application of Artrin to the affected area can be beneficial. Artrin is also suitable as a day or night cream, especially for problematic and inflammation-prone skin.

Urogenital system

Artrin may also be effective in treating the urogenital system. Application of Artrin to the lower abdomen may help during inflammation of the ovaries, fallopian tubes, bladder or uterus in women as well as urinary tract or prostate problems in men. For prostate issues in particular, combining Artrin with oral application of Renol may be beneficial. Artrin may also support spermatogenesis and help maintain optimum sperm quality.

Lymphatic system and kidneys

When fluids accumulate in tissues or organs, swelling or edemas can occur, enlarging the given tissue or organ and in the worst case scenario, impairing its function. Artrin may stimulate the lymphatic system and prevent swelling. Artrin is often applied to the lumbar spine area, which can benefit the kidneys and related organs. According to TCM, high quality kidney function is related to the fundamental Life Gate Fire, which is called Ming Men.

Psyche

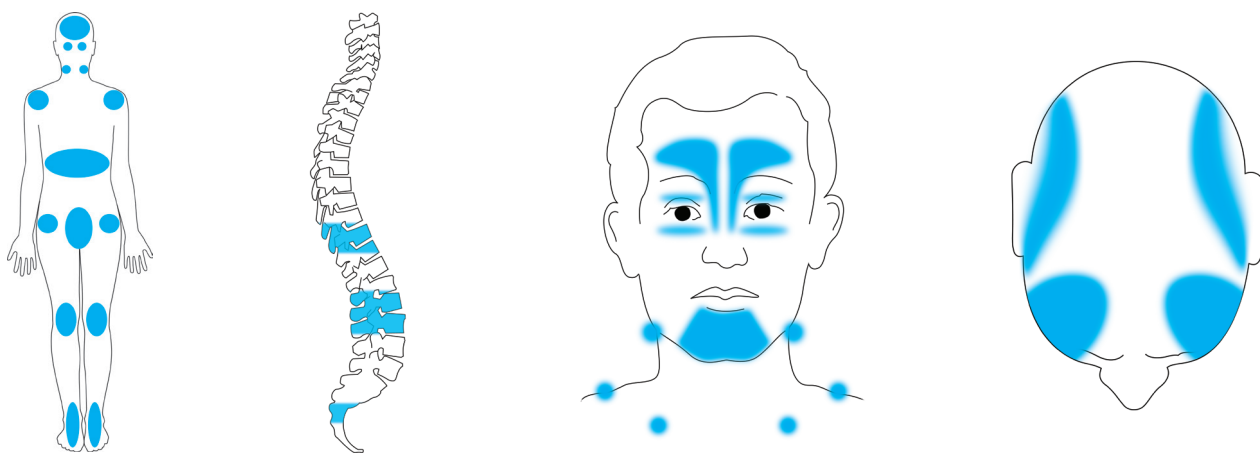

Artrin may help relieve mental tension and promote acceptance of one's circumstances. It may help you feel mentally fresh and free and help create harmony between the soul, body and mind.

Usage of Artrin

- Alleviation of pain and regeneration of damaged tissue, treatment of the entire musculoskeletal system for arthrosis, arthritis, rheumatism, growing pains and post-injury and post-operative conditions (joints, muscles, tendons, bones)
- Headache and mental tension, fatigue, exhaustion, vertigo and ear problems (hearing impairments, rustling and whistling sounds in the ears)
- Upper respiratory bacterial infections, cough and runny nose, sore throat, bringing fever down
- Poorly healing wounds, helping to stop bleeding, post-traumatic shock, concussion
- Acute inflammation (gall bladder, pancreas, muscles, tendons, veins, lungs, kidneys, middle ear, intestines – accompanied by diarrhea, thyroid gland, sinuses and teeth) and post-injury or post-operative inflammation
- Chronic inflammation of the kidneys, bladder, ovaries, fallopian tubes, uterus or prostate; kidney stones
- Protection of the kidneys and support of kidney function
- Support of sperm development in the testes and sperm quality
- Beneficial effect on the lymphatic system, may help lymph flow and reduce water retention in the body; may be suitable for cellulite treatment
- Cold sores, angular cheilitis and minor abrasions, cleanses the skin, anti-acne effect

Artrin cream may be combined with other Energy products.

Main usage of Artrin

Composition of Artrin

Common comfrey, calamus, Canadian horseweed, black locust, meadowsweet, mountain arnica, dill, horse chestnut, butter-and-eggs, liquorice, goldenrod, bay laurel, fenugreek, sweet clover, ginger, nasturtium.

Artrin cream also contains vegetable oils (linseed, castor and peanut), essential oils (e.g. rosemary, eucalyptus, camphor), Podhájska mineral spring water, potassium humate, lecithin, liposomes, a combination of extracts from myrrh, frankincense, and dracena and bioinformation from plants and minerals (crystal, fluorite, malachite, silver, sphalerite, antimonite, calcite and others).

Regenerative process and application method

Artrin is easy to spread and is water soluble. A thin layer is applied locally to affected areas 1–3 times a day. The cream can be applied topically to areas corresponding to the internal locations of different organs, to reflexology zones or acupuncture points for both acute problems and chronic diseases, or feelings of discomfort. The cream can be applied through massage or directly to affected areas. A temporary deterioration of the condition signifies that a reverse regenerative process, also known as a reverse reaction, is taking place. This phenomenon is positive and can be influenced by decreasing application frequency and increasing fluid intake. In these types of cases, we recommend discussing the issue with your consultant or therapist.

Storage: Store in a dry place, out of direct sunlight, between 10°C and 25°C. Protect from frost. Keep out of reach of children.
